# 1 Getting Started

## Important safety information

A power cord is included with the monitor. If another cord is used, use only a power source and connection appropriate for this monitor. For information on the correct power cord set to use with the monitor, refer to the *Product Notices* provided on your optical disc, if one is included, or in your documentation kit.

---

 **WARNING!** To reduce the risk of electric shock or damage to the equipment:

- Plug the power cord into an AC outlet that is easily accessible at all times.
- Disconnect power from the computer by unplugging the power cord from the AC outlet.
- If provided with a 3-pin attachment plug on the power cord, plug the cord into a grounded (earthed) 3-pin outlet. Do not disable the power cord grounding pin, for example, by attaching a 2-pin adapter. The grounding pin is an important safety feature.

For your safety, do not place anything on power cords or cables. Arrange them so that no one may accidentally step on or trip over them. Do not pull on a cord or cable. When unplugging from the AC outlet, grasp the cord by the plug.

To reduce the risk of serious injury, read the *Safety & Comfort Guide*. It describes proper workstation, setup, posture, and health and work habits for computer users, and provides important electrical and mechanical safety information. This guide is located on the web at <http://www.hp.com/ergo>.

 **IMPORTANT:** For the protection of the monitor, as well as the computer, connect all power cords for the computer and its peripheral devices (such as a monitor, printer, scanner) to some form of surge protection device such as a power strip or uninterruptible power supply (UPS). Not all power strips provide surge protection; the power strips must be specifically labeled as having this ability. Use a power strip whose manufacturer offers a damage replacement policy so you can replace the equipment, if surge protection fails.

Use the appropriate and correctly sized furniture designed to properly support your HP LCD monitor.

---

 **WARNING!** LCD monitors that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, or carts may fall over and cause personal injury.

Care should be taken to route all cords and cables connected to the LCD monitor so that they cannot be pulled, grabbed, or tripped over.

 **NOTE:** This product is suitable for entertainment purposes. Consider placing the monitor in a controlled luminous environment to avoid interference from surrounding light and bright surfaces that may cause disturbing reflections from the screen.

---

# Product features and components

## Features

The monitor features include the following:

- 95.29 cm (37.5 in) curved 2300r with 3840 x 1600 resolution, Ultra-Wide Quad High Definition (UWQHD) backlit display, plus full-screen support for lower resolutions
- Tilt capability and easy viewing from sitting or standing position, or while moving from one side of the monitor to the other
- Swivel and height adjustment capabilities
- HDMI (High-Definition Multimedia Interface) video input
- DisplayPort video input
- USB Type-C port with power delivery up to 65 W and DisplayPort Alternate Mode
- USB 3.0 hub with three ports
- Audio-out (headphone) jack
- Premium integrated speakers
- Plug and Play capability if supported by your operating system
- On-screen display (OSD) adjustments in several languages for easy setup and screen optimization
- HP Display Assistant software for adjusting monitor settings and enabling theft-deterrence features
- HDCP (High-bandwidth Digital Content Protection) used on digital inputs
- In select regions, software and documentation optical disc provided with the monitor includes monitor drivers and product documentation
- VESA mounting bracket for attaching the monitor to a wall-mount device or swing arm
- Low Blue Light Mode settings to create a more relaxing and less stimulating image

---

**NOTE:** For safety and regulatory information, refer to the *Product Notices* provided on your optical disc, if one is included, or in your documentation kit. To locate updates to the user guide for your product, go to <http://www.hp.com/support>. Select **Find your product**, and then follow the on-screen instructions.

---

## Front components

Component	Function
1 Menu button	Press to open the OSD menu, select a menu item from the OSD, or close the OSD menu.
2 Function buttons	Use these buttons to navigate through the OSD menu based on the indicators above the buttons that are activated when the OSD menu is open. <b>NOTE:</b> You can reconfigure the Function buttons in the OSD menu to quickly select the most commonly used operations. See <a href="#">Assigning the Function buttons on page 16</a> for more information.
3 Power button	Press to turn the monitor on or off. When the monitor is on, the power light above the power button is on. <b>NOTE:</b> Be sure the master power switch on the rear of the monitor is in the ON position to turn on the monitor.

## Rear components

Component	Function
1 Master power switch	Turns off all power to the monitor. <b>NOTE:</b> Putting the switch in the Off position will yield the lowest power state for the monitor when not in use.
2 Power connector	Connects AC power.
3 HDMI port	Connects an HDMI cable to the source device.
4 DisplayPort port	Connects a DisplayPort cable to the source device.
5 Audio out (headphone) jack	Connects optional powered stereo speakers, headphones, earbuds, a headset, or a television audio cable. <b>WARNING!</b> To reduce the risk of personal injury, reduce the volume before using headphones, earbuds, or a headset. For additional safety information, see the Product Notices provided on the optical disc, if one is included with your product.
6 USB Type-A ports (2) (downstream)	Connects a USB device.
7 Security cable slot	Connects a security cable to a stationary object.
8 USB Type-A port with battery charging 1.2 (downstream)	Connects a USB Type-A cable to the source device.
9 USB Type-C port (upstream)	Connects a USB Type-C cable to the source device. <b>NOTE:</b> The USB Type-C port can also function as a USB upstream port when connected to a USB Type-C source device. The USB Type-C port can function as a DisplayPort audio/video input, as a USB 3.0 upstream connection, or it can be used to deliver up to 65 watts of power to a device. Power outputs are 5 V/12 V/20 V to achieve 15 W output.

## Setting up the monitor

To set up the monitor, ensure that the power is turned off to the monitor, computer system, and other attached devices, then follow the instructions below.

 **NOTE:** Be sure the master power switch, located on the rear panel of the monitor, is in the Off position. The master power switch turns off all power to the monitor.

### Use caution when setting up the monitor

To prevent damage to the monitor, do not touch the surface of the LCD panel. Pressure on the panel may cause nonuniformity of color or disorientation of the liquid crystals. If this occurs the screen will not recover to its normal condition.

### Attaching the monitor stand

 **CAUTION:** The screen is fragile. Avoid touching or applying pressure to the screen; doing so can cause damage.

Do not lay the monitor facedown when attaching the stand. Stress on the curvature of the display panel may damage the panel if the monitor is placed facedown.

 **TIP:** Consider the placement of the display, because the bezel might cause interfering reflections from surrounding light and bright surfaces.

1. Remove the stand from the box.
2. Insert the hooks at the top of the stand plate into the holes (1) on the back of the monitor.
3. Rotate the stand base up and toward the monitor (2) until the stand plate clicks into place.

## Mounting the monitor

The monitor panel can be attached to a wall, swing arm, or other mounting fixture.

 **NOTE:** This apparatus is intended to be supported by a UL- or CSA-Listed wall mount bracket.

 **CAUTION:** This monitor supports the VESA industry-standard 100 mm mounting holes. To attach a third-party mounting solution to the monitor, four 4 mm, 0.7 pitch, 10 mm long screws are required. Longer screws must not be used because they may damage the monitor. It is important to verify that the manufacturer's mounting solution is compliant with the VESA standard and is rated to support the weight of the monitor display panel. For best performance, it is important to use the power and video cables provided with the monitor.

## Removing the monitor stand

 **CAUTION:** Before beginning to disassemble the monitor, be sure the monitor is turned off and all cables are disconnected.

Do not lay the monitor facedown when removing the stand. Stress on the curvature of the display panel may damage the panel if the monitor is placed facedown.

1. Disconnect and remove all cables from the monitor.
2. Place the monitor on a level surface with the bottom of the stand facing up.

 **CAUTION:** The screen is fragile. Avoid touching or applying pressure to the screen; doing so can cause damage.

3. Press down on the release latch (1) and tilt the stand base away from the monitor (2).
4. Disengage the hooks at the top of the stand and lift the stand away from the monitor (3).

## Attaching the VESA mounting bracket

A VESA mounting bracket is included with the monitor for use when attaching the monitor to a wall, swing arm, or other mounting fixture.

1. Remove the monitor stand. Refer to [Removing the monitor stand on page 6](#).
2. Position the VESA bracket so that the connector slot on the bracket is aligned with the connector slot on the monitor.
3. Press the VESA bracket onto the monitor until it clicks into place.

4. To attach the monitor to a swing arm or other mounting device, insert four mounting screws through the holes on the mounting device and into the screw holes on the VESA bracket.

---

 **IMPORTANT:** Follow the mounting device manufacturer's instructions when mounting the monitor to a wall or swing arm.

**IMPORTANT:** For optimal monitor performance and screen clarity, do not rotate the monitor 90 degrees to portrait orientation.

---

## Connecting the cables

 **NOTE:** The monitor ships with select cables. Not all cables shown in this section are included with the monitor.

1. Place the monitor in a convenient, well-ventilated location near the computer.
2. Connect a video cable.

 **NOTE:** The monitor will automatically determine which inputs have valid video signals. The inputs can be selected through the OSD by pressing the **Menu** button and selecting **Input Control**.

- Connect one end of a DisplayPort cable to the DisplayPort port on the rear of the monitor and the other end to a DisplayPort port on the source device.

- Connect one end of an HDMI cable to the HDMI port on the rear of the monitor and the other end to the source device.

3. Connect the Type-C end of a USB cable to the USB Type-C port on the side of the monitor and the other end to a USB Type-A port on the source device.

---

 **NOTE:** You must connect the USB upstream cable from the source computer to the monitor to enable the USB ports on the monitor.

---

---

 **NOTE:** To set the video input source to USB-C, press the Menu button on the front of the monitor, select **Input Control**, and then select **USB-C Configuration**.

- Select the option **3840 × 1600 @ 60 Hz + USB 2.0** for a higher vertical refresh rate and a lower USB speed.  
Or
  - Select the option **3840 × 1600 @ 30 Hz + USB 3.0** for a lower vertical refresh rate and a higher USB speed.
-

4. Connect one end of the power cord to the monitor and the other end to a grounded AC outlet.

---

**⚠ WARNING!** To reduce the risk of electric shock or damage to the equipment:

Do not disable the power cord grounding plug. The grounding plug is an important safety feature.

Plug the power cord into a grounded (earthed) AC outlet that is easily accessible at all times.

Disconnect power from the equipment by unplugging the power cord from the AC outlet.

For your safety, do not place anything on power cords or cables. Arrange them so that no one may accidentally step on or trip over them. Do not pull on a cord or cable. When unplugging the power cord from the AC outlet, grasp the cord by the plug.

---

## Adjusting the monitor

You may tilt the monitor panel forward or backward, raise or lower it, and turn it from one side to the other.

## Installing a security cable

A security cable is a key lock device that has a wire cable attached. You attach one end of the cable to your desk (or other stationary object) and the other end of the cable to the security cable slot on the computer. Secure the security cable lock with the key.

---

**⚠ CAUTION:** Use caution when adjusting the tilt, swivel, or height of the computer if a security cable is installed. The cable or the lock may interfere with the adjustment.

---

## Turning on the monitor

1. Set the master power switch on the rear of the monitor to the On position.
2. Press the power button on the source device to turn it on.
3. Press the power button on the front of the monitor to turn it on.

---

**CAUTION:** Burn-in image damage may occur on monitors that display the same static image on the screen for 12 consecutive hours of nonuse. To avoid burn-in image damage on the monitor screen, you should always activate a screen saver application or turn off the monitor when it is not in use for a prolonged period of time. Image retention is a condition that may occur on all LCD screens. Monitors with a “burned-in image” are not covered under the HP warranty.

**NOTE:** If pressing the power button has no effect, the power button lockout feature may be enabled. To disable this feature, press and hold the power button for 10 seconds.

**NOTE:** You can disable the power light in the OSD menu. Press the menu button on the monitor, select **Power Control**, select **Power LED**, and then select **Off**.

---

When the monitor is powered on, a Monitor Status message is displayed for five seconds. The message shows which input is the current active signal, the status of the auto-switch source setting (On or Off; factory default is On), the current preset screen resolution, and the recommended preset screen resolution.

The monitor automatically scans the signal inputs for an active input and uses that input.

## HP watermark and image retention policy

The IPS monitor models are designed with IPS (in-plane switching) display technology which provides ultra-wide viewing angles and advanced image quality. IPS monitors are suitable for a wide variety of advanced image quality applications. This panel technology, however, is not suitable for applications that exhibit static, stationary, or fixed images for long periods of time without the use of screen savers. These types of applications may include camera surveillance, video games, marketing logos, and templates that are displayed on the screen for a prolonged period of time. Static images may cause image retention damage that could look like stains or watermarks on the monitor’s screen.

---

## 2 Using the monitor

### Software and utilities

The optical disc, if one is included with the monitor, contains files you can install on the computer. If you do not have an optical drive, you can download the files from <http://www.hp.com/support>.

- INF (Information) file
- ICM (Image Color Matching) files (one for each calibrated color space)
- HP Display Assistant software

### The Information file

The INF file defines monitor resources used by Windows operating systems to ensure monitor compatibility with the computer's graphics adapter.

This monitor is Windows Plug and Play-compatible and the monitor will work correctly without installing the INF file. Monitor Plug and Play-compatibility requires that the computer's graphic card is VESA DDC2-compliant and that the monitor connects directly to the graphics card. Plug and Play does not work through separate BNC-type connectors or through distribution buffers/boxes.

### The Image Color Matching file

The ICM files are data files that are used in conjunction with graphics programs to provide consistent color matching from monitor screen to printer, or from scanner to monitor screen. This file is activated from within graphics programs that support this feature.

---

**NOTE:** The ICM color profile is written in accordance with the International Color Consortium (ICC) Profile Format specification.

---

## Installing the INF and ICM files

After you determine that you need to update, use one of the following methods to install the files.

### Installing from the optical disc (available in select regions)

To install the INF and ICM files on the computer from the optical disc:

1. Insert the optical disc in the computer optical drive. The optical disc menu is displayed.
2. View the **HP Monitor Software Information** file.
3. Select **Install Monitor Driver Software**.
4. Follow the on-screen instructions.
5. Ensure that the proper resolution and refresh rates appear in the Windows Display control panel.

## Downloading from the web

If you do not have a computer or a source device with an optical drive, you can download the latest version of INF and ICM files from the HP monitors support website.

1. Go to <http://www.hp.com/support>.
2. Select **Get software and drivers**.
3. Follow the on-screen instructions to select your monitor and download the software.

## Using the on-screen display (OSD) menu

Use the OSD menu to adjust the monitor screen image based on your preferences. You can access and make adjustments in the OSD menu using the buttons on the monitor's bezel.

To access the OSD menu and make adjustments, do the following:

1. If the monitor is not already on, press the power button to turn on the monitor.
2. To access the OSD menu, press one of the three Function buttons to activate the buttons. Then press the menu button to open the OSD.
3. Use the three Function buttons to navigate, select, and adjust the menu choices. The on-screen button labels vary depending on which menu or submenu is active.

The following table lists the menu selections in the OSD main menu.

Main Menu	Description
Brightness	Adjusts the brightness level of the screen. The factory default is 90.
Contrast	Adjusts the contrast level of the screen.
Color Control	Selects and adjusts the screen color.
Input Control	Selects the video input signal.
Image Control	Adjusts the screen image.
Power Control	Adjusts the power settings.
Menu Control	Adjusts the OSD controls.
Management	Adjusts the DDC/CI settings and returns all OSD menu settings to the factory default settings.
Language	Selects the language.
Information	Selects and displays important information about the monitor.
Exit	Exits the OSD menu screen.

## Assigning the Function buttons

Pressing one of the Function buttons activates the buttons and displays the icons above the buttons. The factory default button icons and functions are shown below.

Item	Button	Function
1	Menu	Press to open the OSD menu, select a menu item from the OSD, or close the OSD menu.
2	Color Control (Function button 3 - assignable)	Press to open the Color Control menu and select a menu item.
3	Viewing Modes (Function button 2 - assignable)	Press to navigate through the Viewing Modes menu and select a preset view modes.
4	Next Active Input (Function button 1 - assignable)	Press to navigate through the OSD menu and select a video input source.

You can change the Function buttons from their default values so that when the buttons are activated you can quickly access commonly used menu items.

To assign the Function buttons:

1. Press one of the three Function buttons to activate the buttons, and then press the **Menu** button to open the OSD.
2. In the OSD menu, select **Menu Control > Assign Buttons** and then select one of the available options for the button you want to assign.

**NOTE:** You can reassign only the three Function buttons. You can not reassign the menu button or the power button.

## Adjusting Low Blue Light Mode

Decreasing the blue light emitted by the display reduces the blue light exposure to your eyes. This monitor allows you to select a setting to reduce blue light output and create a more relaxing and less stimulating image while you read content on the screen.

To adjust the blue light output from the display:

1. Press the **Viewing Mode** button.
2. Select a setting:
  - **Low Blue Light:** Reduces blue light for improved eye comfort
  - **Night:** Adjusts to the lowest blue light and reduces the impact on sleep
  - **Reading:** Optimizes blue light and brightness for indoor viewing
  - **HP Enhance +**
  - **Multimedia**
  - **Photo**
  - **Custom**
3. Select **Save and Return** to save your setting and close the **Viewing Mode** menu. Select **Cancel** if you don't want to save the setting.
4. Select **Exit** from the Main menu.

---

 **WARNING!** To reduce the risk of serious injury, read the *Safety & Comfort Guide*. It describes proper workstation, setup, posture, and health and work habits for computer users, and provides important electrical and mechanical safety information. This guide is located on the web at <http://www.hp.com/ergo>.

---

## Using Auto-Sleep Mode

The monitor supports an OSD option called Auto-Sleep Mode that allows you to enable or disable a reduced power state for the display. When Auto-Sleep Mode is enabled (enabled by default), the monitor will enter a reduced power state when the host PC signals low power mode (absence of either horizontal or vertical sync signal).

Upon entering this reduced power state (sleep mode), the monitor screen is blanked, the backlight is turned off, and the power light turns amber. The monitor draws less than 0.5 W of power when in this reduced power state. The monitor will wake from sleep mode when the host PC sends an active signal to the monitor (for example, if you activate the mouse or keyboard).

You can disable Auto-Sleep Mode in the OSD. Press the menu button to open the OSD. In the OSD select **Power Control**, select **Auto-Sleep Mode**, and then select **Off**.

## 3 Support and troubleshooting

### Solving common problems

The following table lists possible problems, the possible cause of each problem, and the recommended solutions.

Problem	Possible Cause	Solution
Screen is blank or video is flashing.	Power cord is disconnected.	Connect the power cord.
	Power is off.	Press the front panel power button. <b>NOTE:</b> If pressing the power button has no effect, press and hold the power button for 10 seconds to disable the power button lockout feature.
	Master power switch is turned off.	Set the master power switch on the rear of the monitor to the On position.
	Video cable is improperly connected.	Connect the video cable properly. Refer to <a href="#">Connecting the cables on page 8</a> for more information.
	System is in sleep mode.	Press any key on the keyboard or move the mouse to inactivate the screen blanking utility.
Video card is incompatible.	Open the OSD menu and select the <b>Input Control</b> menu. Set <b>Auto-Switch Input</b> to <b>Off</b> and manually select the input.	
Image appears blurred, indistinct, or too dark.	Brightness setting is too low.	Open the OSD menu and select <b>Brightness</b> to adjust the brightness scale as needed.
<b>Check Video Cable</b> is displayed on the screen.	Monitor video cable is disconnected.	Connect the appropriate video signal cable between the computer and monitor. Be sure that the computer power is off while connecting the video cable.
<b>Input Signal Out of Range</b> is displayed on the screen.	Video resolution and/or refresh rate are set higher than what the monitor supports.	Change the settings to a supported setting (see <a href="#">Preset display resolutions on page 22</a> ).
The monitor is off but it did not seem to enter a low-power sleep mode.	The monitor's power saving control is disabled.	Open the OSD menu and select <b>Power Control</b> , select <b>Auto-Sleep Mode</b> , and then set auto-sleep to <b>On</b> .
<b>OSD Lockout</b> is displayed.	The monitor's OSD lockout function is enabled.	Press and hold the menu button on the front panel for 10 seconds to disable the OSD lockout function.
<b>Power Button Lockout</b> is displayed.	The monitor's power button lockout feature is enabled.	Press and hold the power button for 10 seconds to unlock the power button function.

### Button lockouts

Holding down the power button or menu button for ten seconds will lock out the functionality of the buttons. You can restore the functionality by holding the buttons down again for ten seconds. This functionality is only available when the monitor is powered on, displaying an active signal, and the OSD is not open.

## Product support

For additional information on using your monitor, go to <http://www.hp.com/support>. Select **Find your product**, and then follow the on-screen instructions.

 **NOTE:** The monitor user guide, reference material, and drivers are available at <http://www.hp.com/support>.

Here you can do the following:

- Chat online with an HP technician

 **NOTE:** When support chat is not available in a particular language, it is available in English.

- Locate an HP service center

## Preparing to call technical support

If you cannot solve a problem using the troubleshooting tips in this section, you may need to call technical support. Have the following information available when you call:

- Monitor model number (see [Locating the serial number and product number on page 19](#))
- Monitor serial number (see [Locating the serial number and product number on page 19](#))
- Purchase date on invoice
- Conditions under which the problem occurred
- Error messages received
- Hardware configuration
- Name and version of the hardware and software you are using

## Locating the serial number and product number

The rating label on the monitor provides the product number and serial number. You may need these numbers when contacting HP about the monitor model. The rating label is located on the bottom of the monitor panel.

---

# 4 Maintaining the monitor

## Maintenance guidelines

To enhance the performance and extend the life of the monitor:

- Do not open the monitor cabinet or attempt to service this product yourself. Adjust only those controls that are covered in the operating instructions. If the monitor is not operating properly or has been dropped or damaged, contact an authorized HP dealer, reseller, or service provider.
- Use only a power source and connection appropriate for this monitor, as indicated on the label/back plate of the monitor.
- Be sure the total ampere rating of the products connected to the outlet does not exceed the current rating of the AC outlet, and the total ampere rating of the products connected to the cord does not exceed the rating of the cord. Look on the power label to determine the ampere rating (AMPS or A) for each device.
- Install the monitor near an outlet that you can easily reach. Disconnect the monitor by grasping the plug firmly and pulling it from the outlet. Never disconnect the monitor by pulling the cord.
- Turn the monitor off when not in use. You can substantially increase the life expectancy of the monitor by using a screen saver program and turning off the monitor when not in use.

**NOTE:** Monitors with a “burned-in image” are not covered under the HP warranty.

- Slots and openings in the cabinet are provided for ventilation. These openings must not be blocked or covered. Never push objects of any kind into cabinet slots or other openings.
- Do not drop the monitor or place it on an unstable surface.
- Do not allow anything to rest on the power cord. Do not walk on the cord.
- Keep the monitor in a well-ventilated area, away from excessive light, heat, or moisture.
- Never lay the monitor facedown. Stress on the curvature of the display panel may damage the panel if the monitor is placed facedown.

## Cleaning the monitor

1. Turn off the monitor and unplug the power cord from the back of the unit.
2. Dust the monitor by wiping the screen and the cabinet with a soft, clean antistatic cloth.
3. For more difficult cleaning situations, use a 50/50 mix of water and Isopropyl alcohol.

**CAUTION:** Spray the cleaner onto a cloth and use the damp cloth to gently wipe the screen surface. Never spray the cleaner directly on the screen surface. It may run behind the bezel and damage the electronics.

**CAUTION:** Do not use cleaners that contain any petroleum based materials such as benzene, thinner, or any volatile substance to clean the monitor screen or cabinet. These chemicals may damage the monitor.

---

## Shipping the monitor

Keep the original packing box in a storage area. You may need it later if you move or ship the monitor.

# A Technical specifications

**NOTE:** All specifications represent the typical specifications provided by HP's component manufacturers; actual performance may vary either higher or lower.

For the latest specifications or additional specifications on this product, go to <http://www.hp.com/go/quickspecs/> and search for your specific monitor model to find the model-specific QuickSpecs.

<b>Display</b>	<b>95.29 cm</b> wide screen	37.5 in wide screen

Off	<0.3 W
<b>Input terminal</b>	One DisplayPort port, one HDMI port, one analog audio-in jack, three USB 3 ports, one USB Type-C port

## Preset display resolutions

The display resolutions listed below are the most commonly used modes and are set as factory defaults. This monitor automatically recognizes these preset modes and they will appear properly sized and centered on the screen.

Preset	Pixel format	Horz freq (kHz)	Vert freq (Hz)
1	640 × 480	31.469	59.940
2	720 × 400	31.469	70.087
3	800 × 600	37.879	60.317
4	720 × 480	31.469	59.940
5	1024 × 768	48.363	60.004
6	1280 × 720	45.000	60.000
7	1280 × 1024	63.981	60.020
8	1440 × 900	55.935	59.887
9	1600 × 900	60.000	60.000
10	1600 × 1200	75.000	60.000
11	1680 × 1050	65.290	59.954
12	1920 × 1080	67.500	60.000
13	1920 × 1200	74.038	59.950
14	1920 × 1200	74.556	59.885
15	2560 × 1440	88.787	59.951
16	2560 × 1600	98.713	59.972
17	3840 × 1600	98.760	60.000
18	3840 × 1600	48.689	29.999
19	2560 × 1080	66.000	60.000

Preset	Timing name	Pixel format	Horz freq (kHz)	Vert freq (Hz)
1	480i	720 × 480	15.734	59.940
2	480p	720 × 480	31.469	59.940
3	720p60	1280 × 720	45.000	60.000
4	1080i60	1920 × 1080	33.750	60.000

Preset	Timing name	Pixel format	Horz freq (kHz)	Vert freq (Hz)
5	576i	720 × 576	15.625	50.000
6	576p	720 × 576	31.250	50.000
7	720p50	1280 × 720	37.500	50.000
8	1080i50	1920 × 1080	28.125	50.000
9	1080p60	1920 × 1080	67.500	60.000
10	1080p50	1920 × 1080	56.250	50.000

## Entering user modes

The video controller signal may occasionally call for a mode that is not preset under the following conditions:

- You are not using a standard graphics adapter.
- You are not using a preset mode.

If this occurs, you may need to readjust the parameters of the monitor screen by using the on-screen display. Your changes can be made to any or all of these modes and saved in memory. The monitor automatically stores the new setting, and then recognizes the new mode just as it does a preset mode. In addition to the factory preset modes, there are at least 10 user modes that can be entered and stored.

## Energy saver feature

The monitor supports a reduced power state. The reduced power state will be entered into if the monitor detects the absence of either the horizontal sync signal or the vertical sync signal. Upon detecting the absence of these signals, the monitor screen is blanked, the backlight is turned off, and the power light turns amber. When the monitor is in the reduced power state, the monitor will utilize <0.5 watts of power. There is a brief warm-up period before the monitor will return to its normal operating state.

Refer to the computer manual for instructions on setting the energy saver mode (sometimes called power management feature).

**NOTE:** The above energy saver feature works only when the monitor is connected to a computer that has energy saver features.

By selecting the settings in the monitor's Sleep Timer utility, you can also program the monitor to enter into the reduced power state at a predetermined time. When the monitor's Sleep Timer utility causes the monitor to enter the reduced power state, the power light blinks amber.

---

## B Accessibility

HP designs, produces, and markets products and services that can be used by everyone, including people with disabilities, either on a stand-alone basis or with appropriate assistive devices.

### Supported assistive technologies

HP products support a wide variety of operating system assistive technologies and can be configured to work with additional assistive technologies. Use the Search feature on your source device that is connected to the monitor to locate more information about assistive features.

**NOTE:** For additional information about a particular assistive technology product, contact customer support for that product.

---

### Contacting support

We are constantly refining the accessibility of our products and services and welcome feedback from users. If you have an issue with a product or would like to tell us about accessibility features that have helped you, please contact us at (888) 259-5707, Monday through Friday, 6 a.m. to 9 p.m. Mountain Time. If you are deaf or hard-of-hearing and use TRS/VRS/WebCapTel, contact us if you require technical support or have accessibility questions by calling (877) 656-7058, Monday through Friday, 6 a.m. to 9 p.m. Mountain Time.
